

# Conservation Development Design Workshop

Presented by: **Randall Arendt, FRTP, ASLA**

**June 25<sup>th</sup> at the Pearl Studio in San Antonio**  
**8:00 am to 3:30pm**

Taking place at the newly transformed Pearl Studio in San Antonio, this hands-on workshop will feature acclaimed expert Randall Arendt, a premier professional in conservation development design. Join us as we explore how conservation subdivisions can accommodate profitable development while maintaining the intrinsic values of the natural and rural landscape.

The presentation and planning exercise will demonstrate practical, easy-to-use techniques to enable developers and property owners to work together to implement full density residential subdivisions in such a way that helps to build a community-wide network of productive, protected and sustainable land use.

With today's movement towards thoughtful development, this workshop will be useful for property owners; regulatory state and public officials; design, planning, development professionals; and real estate community to learn how to plan, design and market successful Conservation Subdivisions.
