

Water Conservation – Landscape And Drought

Milan J. Michalec

Cow Creek Groundwater Conservation District

Xeriscape In The Hill Country Does Not Mean Zero Color

Typical Conditions

Drought Conditions

Put Away The Hose – Hand Water

Condensate Recovery

Typical Summer Daily Production

8-10 Gallons Per Day

Sump/Transfer Pump

Excess Condensate to Storage

Basic Water Storage

Remove Screw - On Top

Remove Water With Bucket or Pump

Basic Rainwater Harvesting

Improved Rainwater Harvesting

Basic Rainwater Harvesting System For Landscape Use (200 Square Foot Roof)

Install Gutters

Storage Tank (1550 Gal)

Add Collector Pipe

Gravity Feed To Storage

Lesson Learned: Sunlight Does Get Inside Tank
Problem: Algae Growth
Solution: Paint Exterior
