

What To Do When Springs Go Dry

springs in Brune (1975) modified by Brune (1981)

- 273 springs
 - 40 dry (15%)
 - 5 inundated

as of today

- 273 springs
 - 62 dry (23%)
 - 9 inundated

How to Save a Spring (In Three Steps)

1. Engage with your local Groundwater Conservation District (GCD)
2. Develop the science to understand groundwater and surface water interactions
3. Galvanize your community around shared values and solutions
