

## **Llano River Riparian Woodlands Workshop Junction, TX September 10**

*Learn or review the introductory principles of a healthy riparian, including the plants and land management practices that create a functioning riparian, providing values to all.*

*Have you noticed we're losing the Llano River riparian woodlands little by little? Learn what's impacting these irreplaceable woodlands and what can be done.*

**Date:** Saturday, September 10, 2022  
**Time:** 8:30 AM

**Presenter:** Steve Nelle, Natural Resource Specialist/Wildlife Biologist, retired NRCS

**Location:** Llano River Field Station, Texas Tech University Center at Junction, 254 Red Raider Lane.

**Sponsor:** Llano River Watershed Alliance

**Registration:** Fee \$10 Go to [llanoriver.org](http://llanoriver.org) for form and to register online or by mail.

**Registration limited to 30 participants.**

**Earn CEU and Advanced Training TMN credit hours**

### **Agenda**

**8:30-10:00** Indoor presentation covering the introductory principles of a healthy riparian and the impact of Axis deer.

**10:00-12:30** Field Trip to the South Llano River State Park with three stops.

1. Observation of the park's healthy and functioning riparian along the river, and the vegetation, including treated Arundo, a non-native invasive giant cane.
2. 3/4 mile walk through the park's riparian woodlands to see the impact of Axis deer and a history of various enclosure projects. Identification of woodland vegetation, as well as the non-native Mexican Needle grass.
3. 1/4 mile walk to see 27 year-old enclosure and the story it tells.
