

Tyson Broad

Tyson Broad is a Research Associate with the Lone Star Chapter of the Sierra Club. He has a B.S. in Geography from Texas A&M University and a M.S. in Geography/Natural Resources Management from Oregon State University. Tyson served as the Water-Use Project Specialist for the U.S. Geological Survey in Portland, Oregon for eight years. Since joining the Sierra Club in 2004, Tyson has focused water issues in Central and South Central Texas and has co-authored the reports '*Water Loss from Texas Water Suppliers*', '*Alternative Water Management Strategies for the 2006 South-Central Texas Water Plan*', and '*Desalination: Is it Worth its Salt?*' In 2009, he was named to the Environmental Flows Stakeholder Committee for the Guadalupe and San Antonio Basin and Bay Area. Tyson is also a co-founder of the South Llano Watershed Alliance, a landowner partnership working to preserve and enhance the Llano River.
