

## Second Stakeholder Meeting - This Tuesday Night!

The second stakeholder meeting of the [Upper Llano River Watershed Protection Plan](#) will be at Texas Tech Junction, Tuesday, October 9th at 6:30. *Refreshments and Sign-in will begin at 6:00.* Click [here](#) for the agenda.

Over 90 people attended the [first meeting](#) in August. Tuesday's meeting will be an opportunity to learn more about water quality conditions in the North and South Llano and why these conditions occur.

Everyone with an interest in the Llano River has a role in this endeavor to identify ways to improve, preserve and enhance water quality. Tuesday evening's meeting will help ensure that everyone's interests are represented.

The South Llano Watershed Alliance is just another stakeholder in this process. However, we have been requested by [Texas State Soil and Water Conservation Board](#), [Texas Water Resources Institute](#), and the [Llano River Field Station](#) to facilitate outreach for this effort through our website and electronic mailing list. Please be sure to visit [www.southllano.org](http://www.southllano.org) to stay abreast with the Watershed Protection Planning effort.

See you Tuesday.
