## Rainwater Harvesting: *Innovative Uses and Water Security*

The Texas Water Symposium provides perspectives from landowners, policy makers, scientists, water resource experts and regional leaders.

Join us as we explore the complex issues and challenges in providing water for Texans in this century.

Each session is free and open to the public. The events are recorded and aired on Texas Public Radio one week later.

*Water, essential for life, is our most precious and valuable natural resource. But water supply and quality are under increasing pressure from a growing population. How will we protect this resource and plan for a sustainable future? There is a great need for a water-literate public; decisions being made today have far reaching and long lasting effects for our children and future generations.*

**Thursday, December 7, 2017**

Historic Kendall County Courthouse -- Upstairs Courtroom  
201 E San Antonio Ave, Boerne, TX 78006  
Doors open at 6:30, Program 7:00 – 8:30 pm

**Moderator: Bob Webster** – Cow Creek GCD Director, Owner Shades of Green Nursery

**Panelists:**

**Rep. Jason Isaac** – Texas State Representative, District 45

**John Kight** – Rainwater Harvesting Advocate

**Ana Gonzalez PhD.** – Environmental Scientist, City of Austin Watershed Protection

**Troy Dorman PhD. P.E.** – Director, Tetra Tech Engineering

Declining aquifer levels and the rapidly rising cost of water supply and management has prompted suppliers, builders, and homeowners across the region to turn to alternative sources of water. As we look to a long-term future of increasing population growth and demand on groundwater resources, how can individuals, businesses, and cities create sustainable water supply in innovative ways? How can we incentivize water independence and conservation?

Increasingly, these stakeholders are turning to rainwater as a viable source of water for landscape irrigation, in-home and commercial uses. Cities are now utilizing rainwater harvesting as an innovative stormwater management strategy. Texas, and the Hill Country, is known as a region of rainwater harvesting innovation nationwide.

Join our moderator and panel in a conversation about sustainable natural solutions to our growing water needs in the Hill Country.

*Thank you for helping Texas Water Symposium celebrate 10 years of water exploration!*
